

Dominik Szlaza

FULL-STACK DEVELOPER

Full-stack developer with 5 years of experience in building and developing web applications. I build end-to-end systems using Python (Django, FastAPI) and TypeScript (Vue, Nuxt), with a focus on code quality and scalability.

EXPERIENCE

Full-stack developer • ImpiCode • remote

05/2021 - present

Crowdfunding platform

- developed REST API (**Python, Django**, DRF) and frontend (Angular)
- built a campaign management system
- integrated payment gateway (Przelewy24) and AWS services (S3, EC2)

Loyalty programs platform (multi-tenant SaaS)

- developed and maintained frontend (**Vue, Nuxt, Docker**), designed UI
- worked with **multi-tenant architecture** and supported REST API development (PHP, Symfony, MySQL)
- contributed to maintenance and migration of legacy system (PHP, Zend)

B2B e-commerce platform

- developed frontend (**Vue**) for a B2B platform with configurable products
- implemented complex form logic and contributed to UI design
- supported backend development and maintenance (PHP, Yii2)

Mobile application

- built mobile application (React Native) supporting post-amputation patients
- integrated with API, designed UI and implemented user flows

PERSONAL PROJECTS

Tickets - event ticketing system

- REST API in Python (**FastAPI**, PostgreSQL, **Docker**), frontend in Next.js (TypeScript) and a mobile app for QR-based ticket validation in React Native

CRM system (DDD)

- REST API for a CRM system in **Python (FastAPI, PostgreSQL, Docker)**, following the principles of Domain-Driven Design (**DDD**)

GuessVerse - lyrics quiz application

- full-stack quiz application in **Nuxt** (PostgreSQL, Prisma, **Docker**) with a modular data integration system and **CQRS** pattern

FoodTrack - calorie tracking application

- full-stack application in **Python (Django, DRF, Celery, PostgreSQL)** and React for tracking calories and macronutrients

EDUCATION

Informatics and Econometrics (master's, spec. Big Data) **10/2020-07/2022**

University of Gdańsk

Economics (bachelor's, spec. managerial economics) **10/2017-07/2020**

Gdańsk University of Technology

TECH STACK

Backend:

- **Python, Django, FastAPI**
- PHP, Yii2
- Celery
- PostgreSQL, MySQL
- REST, CQRS, DDD fundamentals

Frontend:

- **TypeScript/JavaScript, Vue, Nuxt**
- React, Next.js, Astro, React Native
- HTML, CSS
- Figma

DevOps & tools

- **Docker, Docker Compose**
- Git (GitLab, Bitbucket)
- AWS (S3, EC2)

LANGUAGES

- **english** - professional proficiency
- **norwegian** - intermediate
- **spanish** - elementary

INTERESTS

- football (amateur player and follower of Polish Ekstraklasa)
- strength training
- video game industry
- woodworking (DIY projects)
